

1) Concept Map for Predicting house Prices

1) Identify Key terms:

- a) Land rate
- b) location
- c) House type
- d) Number of rooms
- e) 1 BHK / 2 BHK

2) Relationship Table:

Supervised learning → training dataset → logistic regression

3) Dataset:

S No	Land rate (\$/ft)	Location	No of rooms	Type of house
1	12000	chennai	3	Apartment
2	15000	Hydrabad	2	House
3	7000	Delhi	1	House

4) Dataflow Diagram

5) concept map

2) Construct concept map demonstrating how classification algorithms are used in medicine Disease Prediction

1) Key terms:

- a) Blood type
- b) Disease (sugar or heart)
- c) gender
- d) weight
- e) Diet

2) Relationship Table:

Supervised learning → Training data → classification algorithms

3) Data set:

S.No	Blood Type	Gender	Weight	Disease
1	O+	M	60	Sugar
2	O-	F	55	Diabetes
3	B+	F	50	Hest

4) Dataflow Diagram:

5) Concept Map:

3) Construct a concept map showing how machine learning is applied in credit card fraud detection

1) Key words:

- a) card Type
- b) limit
- c) pin
- d) Promotion messages
- e) sender

2) Relationship Table:

Supervised Learning → Training dataset → Linear Regression

3) Data set:

S.No	Card Type	Pin	Limit	Card Valid Date
1	Platinum	1245	1000000000	17/9/27
2	Gold	3456	10000000	16/5/26
3	Silver	4534	1000000	15/10/27

4) Data flow Diagram:

5) concept map:

4) Student Performance Prediction using multiple linear regression

1) Key words:

- a) name
- b) Reg no
- c) Gender
- d) CGPA
- e) Attendance

2) Relationship Table:

Supervised learning → Training dataset →

3) Dataset:

S No	Name	Reg no	Gender	Cgpa	Attendance
1	Ramu	192425190	M	8.90	95%
2	Raghu	192425191	M	9.00	97%
3	Seetha	192425192	F	9.01	98%

4) Dataflow Diagram:

5) concept map:

5) Loan Approval Prediction using Decision Tree

1) Key words:

- a) Name
- b) Credit score
- c) Amount
- d) Approval
- e) Documentation

2) Relationship Table:

Supervised Learning $\rightarrow$ training data $\rightarrow$ Decision tree

3) Dataset:

S.NO	Name	Amount	Credit Score	Approval
1	Asif	100000	900	Yes
2	Sudha	50000	600	No

4) Dataflow diagram

5) concept map:
